## Projects / Open-Source

**Tour and Travel Management System (TTMS) -**          HTML, CSS, JavaScript, Bootstrap, PHP, MySQL.

The Tourism Management System is like a smart online tool to make managing tourism activities easier. It's different from other systems because it facilitates the planning, booking, and management of travel-related activities. We've added a special login for administrators so they can keep an eye on everything.

**Smart Resume Collection & Filtering System** -      HTML, CSS, JavaScript, Bootstrap, Flask, NLP, MySQL.

an innovative recruitment solution, leveraging HTML, CSS, and JavaScript to create an intuitive user interface for seamless resume submission and job matching. Integrated cutting-edge NLP and machine learning algorithms to revolutionize candidate selection processes.

**Food Court | Web application**                              CSS, HTML, JavaScript

Keylogger is malicious software that records every keystroke made by user on a computer without the user's knowledge, to gain fraudulent access to passwords and other confidential information.

**Personal Portfolio | Website**                             CSS, HTML, JavaScript
